PROFESSIONAL SUMMARY

Recent B.Tech graduate in Computer Science Engineering (AI & ML) with hands-on experience in machine learning, computer vision and Power BI dashboard development. Skilled in Python, SQL, TensorFlow, and data-driven problem solving with experience building real-world AI solutions and real-time analytics applications

TECHNICAL SKILLS

Languages: Python, Java

AI/ML: Scikit-Learn, TensorFlow, XGBoost, LSTM, CNN, NLTK

Computer Vision: OpenCV, YOLO

Data & Viz: Numpy, Pandas, Matplotlib, Seaborn, Power BI, DAX

Others: SQL, Power BI, Streamlit.

EDUCATION

Bachelor of Technology - Computer Science Engineering (AI & ML) 2021-2025

VIT-AP University, Amaravati, Andhra Pradesh | CGPA: 8.76/10

Board of Intermediate Education (MPC) 2019-2021

Lakshyaa Junior College, Vijayawada, Andhra Pradesh | Percentage: 95.8%

EXPERIENCE

Student Intern - SmartInternz Aug 2023 - Nov 2023

Eye Disease Classification | CNN | Medical AI

- Built a CNN-based classifier on retinal fundus images achieving 92%+ accuracy across multiple eye condition Categories
- Applied preprocessing techniques (enhancement, resizing, normalization), reducing image noise by 20% and improving feature extraction
- Gained end-to-end experience in model training, hyperparameter tuning and interpretability for medical AI Applications.

PROJECTS

Smart Security Camera System Jan 2026 - Apr 2026

- Built a real-time object detection and tracking pipeline using YOLOv8+ByteTrack, maintaining stable person tracking across occlusions.
- Integrated Telegram bot alerts that deliver annotated snapshot images and event metadata within seconds of intrusion detection.
- Designed an SQLite event logging schema and a Streamlit + Plotly dashboard for real time monitoring and historical analysis.

IPL Ball by Ball Analytics Dashboard Sep 2025

- Processed 2,00,000+ ball by ball records (IPL 2008-2023) in Power BI including data quality fixes.
- Designed a 4 page interactive dashboard: Overview, Match-wise, Batting, Bowling Analysis

Weather Forecasting on Time-Series Data Aug 2024 - Dec 2024

- Built a hybrid LSTM + XGBoost model on Bangalore rainfall data achieving 86.45% (XGBoost) and 86.36% (LSTM) accuracy on rain-day prediction
- Applied feature engineering: lag creation, rolling statistics, and seasonal decomposition for improved generalization.

CERTIFICATIONS

- Machine Learning Specialization – Coursera (Andrew Ng, DeepLearning.AI)
- Google Student Developer – AI/ML Certified – SmartInternz
- Data Structures and Algorithms – Board Infinity
- Java Development on Oracle Cloud – Oracle
